Adjustment Explanations

Roof / HVAC adjustment - $85,000. During the trailing period, Borrower completed roof and HVAC work that management considers extraordinary, non-recurring and capital in nature. The expenditure was recorded in repairs and maintenance for management-reporting purposes. Borrower has excluded the amount from its covenant NOI calculation.

Pressed & Poured Juice annualization - $40,000. The tenant commenced occupancy March 1, 2026. Borrower has included the current contractual annual base rent in its covenant NOI calculation because the tenant is open and operating as of the certificate date.
