RE: Cedar Grove Marketplace - Request for $12,000,000 Refinance

Cedar Grove Marketplace LLC (the "Borrower") respectfully requests a $12.0 million first-mortgage refinance of Cedar Grove Marketplace, a grocery-anchored neighborhood shopping center located in suburban Dallas/Fort Worth, Texas. The requested facility would refinance the Borrower's existing TriState Capital Bank mortgage, fund customary closing costs and reserves, and provide limited return of sponsor capital.

Cedar Grove Marketplace was developed in 2008 and renovated in 2019. The center contains approximately 96,400 square feet and remains approximately 95% leased, anchored by FreshMart Market. The tenant roster also includes PharmaPlus, FitZone Fitness, ValueMart, PetHouse, First Community Bank and a diversified group of local service and food tenants.

The sponsor, Redwood Creek Real Estate Holdings LLC, has owned and operated neighborhood retail properties in Texas for more than fifteen years. The Borrower is seeking to complete the refinance on or before the existing loan maturity of September 30, 2026.

Borrower Narrative

Operating performance

Property performance has remained stable despite normal shop-space turnover. Management has continued leasing activity during 2026, including the commencement of Pressed & Poured Juice in March. Current vacancies consist primarily of two shop spaces totaling approximately 7,600 square feet. Management is actively marketing both suites.

Tenant base and leasing

FreshMart Market remains the principal traffic driver and occupies 34,000 square feet under a lease stated to expire December 31, 2033. PharmaPlus, ValueMart, PetHouse and other national/regional tenants complement a diversified local-service tenant base. The enclosed rent roll reflects current billing terms and lease expirations maintained by property management.

Capital and property condition

During the trailing twelve months, ownership completed approximately $85,000 of roof and HVAC work that management considers non-recurring capital in nature. These expenditures were recorded through repairs and maintenance in the property operating statement. The sponsor believes the work improves near-term operating reliability and should be considered separately when assessing normalized property cash flow.
